# Duntower **Wines**

Committed to Providing Quality Products and Services

## **Duntower Wines**

Devoted to the commercialization of Argentinean and Chilean wines for international markets. We produce our own brand of premium wines and supply our clients with their private brands upon request. Both, with the same quality standards.

In Argentina, the provinces of Mendoza and San Juan, represent the most important wine region of the country, where more than 85% of Argentine wines are produced. Its dry climate, combined with its cold winters, mild springs, cool summers, and uniquely lime and clay-filled soils, create the ideal conditions for the production of these internationally acclaimed wines.

The production of high-quality wine, demands expertise in several areas such as workforce, know-how techniques and timing. In addition, grape origin is another crucial element in premium wine production. The location of the vineyard is vital for finished product characteristics.

DUNTOWER WINES boasts international prestige for best wines and counts with a specialized group of professionals fully capable to advise our customers when it comes to making appropriate wine choices for each market.
